

PROJECT PROFILE ON TAILORING UNIT

INTRODUCTION

Tailoring shop is a small establishment set up anywhere in a market place to provide services to the individual for making tailored garments as per one's choice / fashion. It is preferred to set up near to cloth shop to have more job work from shop and from individual knowledge of understanding fabric quality and skill in cutting and stitching are important to run a tailoring shop successfully. Tailoring shop may undertake job work for made ups and home textiles & interior decoration work.

MARKETING POTENTIAL

A good number of customers still prefer to wear tailor-made garments as per their choice. It is cost effective in comparison to readymade garments in a rural and semi-urban area. Tailoring shop can do work for manufacturing of made ups and home furnishings. It may also take a small order from readymade garments manufacturing units on job work basis. There is scope to undertake job work for interior decoration for tents etc. on regular basis.

MANUFACTURING PROCESS

The customer usually provides cloth for stitching the garment as per requirement to the tailor shop. The tailor master takes the measurement of individual and cut the cloth as per required dimensions and stitches it with the ordinary sewing machines & over lock machine. Then the Buttonholes are made and button are stitched manually. Then the stitched garment is ironed and delivered to the customer.
